Newly Post graduated Web developer with software development project experience. Focused, results-driven and knowledgeable in multiple programming languages , frameworks and tools . Seeking an opportunity to enhance various software packages.

Projects

- ### Simon Says (Web Game)
  - Simon games challenge memory retention capacity by generating a sequence of colors for a player to repeat. After each successful series of presses, "Simon" repeats the list followed by an additional random color. Game play continues until the player makes a mistake.
  - In this game I used HTML5, CSS3 and Javascript.This game is fully responsive .

- ### Guess The Number (Web Game)

  - The player attempts to guess the number. After each guess, the player answers either "Higher", "Lower" or "Correct!" depending on whether the secret number is higher, lower or equal to the guess.

- ### Spotify Clone(Music Web APP)(MINI PROJECT)
  - Spotify clone is a music streaming platform that helps you gain an advantage in the lucrative streaming industry. An app similar to Spotify helps you offer millions of songs of different genres to users.
  - This Clone is created with Frontend Konwledge.I used HTML5, CSS3 and Javascript.

- ### Amazone Clone(Ecommerce Web APP)(MAJOR PROJECT)   *Persent*
  - Amazon Clone is a web application developed using React and Firebase technologies. It is a project that replicates the core functionalities of Amazon.com, such as product browsing, searching, adding to cart, and checkout with a great UI experience.
